

Previsesystems is a young and fast-growing Swiss company in **energy trading software**.

Previsesystems has been set up and is run by a team of industry specialists who share a vision of developing **better software** for this market, delivering implementation and support services more efficiently and having more **fun** doing it!

At Previsesystems, we utilise the **most modern available technology** to implement **innovative** new concepts to deliver the next software generation, smart and scalable, to the energy markets. Our vision is to become the global leader in energy trading software.

We pride ourselves on a **flat hierarchy** and a “let’s do it!” attitude.

To complement our team, we are currently looking for a

Product Owner - US Gas

Location: US / Texas

Start Date: ASAP

About the Role

In this role you will be working as part of a small and diverse product management and development team to oversee all activities relating to the research, design, and rollout of functionality for the US Natural Gas market. You will use your significant experience in the US energy market and interactions with Previsesystems clients to develop a vision and execute on a product roadmap. In doing so, you will oversee an assigned development team, facilitate knowledge transfer of the component, and maintain a set of related master data. You will also work closely with other Product Owners, Customer Support, and Development teams to resolve issues and improve the user experience within your component and hand-offs to other components.

Key Responsibilities

- Make strategic decisions about items on the US Natural Gas roadmap
- Communicate and champion the product vision both internally and externally
- Oversee the design, development, and rollout of US Gas functionality
- Work with the Master Data team to maintain related master data
- Routinely perform knowledge transfer and maintain product artefacts
- Engage with Product Owners, Customer Support, and Development teams, and customers on answering product questions, resolving issues, etc.

About You

You have a bachelor’s or master’s degree. You are a team player who works well under pressure and who likes to challenge yourself by working with highly experienced and talented individuals. You are open-minded and like to work with both internal developers as well as businesspeople from the customer side.

You also have:

- A thorough understanding of US Natural Gas Markets
- Experience using and/or implementing ETRM systems
- A knack for balancing competing demands and priorities
- An ability to convert complex business topics into stories/tasks and communicate them to business and technical counterparts
- Previously thrived in a fast-paced environment
- An ability to collaborate with a variety of stakeholders and find win-win solutions
- A track record of delivering high-quality results, meeting and exceeding expectations

Work Environment

We offer a friendly, driven, multi-cultural and multi-lingual environment in a classical professional office. We have a very open culture and provide a very high degree of freedom, provided the individual is delivering the expected results.

Position Type / Expected Hours of Work

This position typically operates during regular business hours during the week, but our intent is to provide a high degree of freedom for the right candidate. Occasional after hours work for special projects will be required.

Travel

Occasional travel to Previs customer sites for conducting discovery workshops will be required as well as travel for company gatherings a few times per year.

Apply for this job now by sending your cover letter and resume to career@previsystems.com.

We look forward to hearing from you!
